

# Third Grade

## AMI Days Work Instructions

For each AMI (Alternate Method of Instruction) day, please have your student complete the packet at their own pace. You will receive an email from us to complete the specific day's packet (Ex: Please complete Day 1 worksheets). They may receive help if needed. When finished, please make sure to place the completed packet in your child's Take Home folder so it can be returned to school.

If you have any questions at all, please contact your child's teacher using the email address below:

Mrs. Nelson: [tnelson@seymourschool.net](mailto:tnelson@seymourschool.net)

Mrs. Piles: [tpiles@seymourschool.net](mailto:tpiles@seymourschool.net)

Ms. Richards: [sarahrichards@seymourschool.net](mailto:sarahrichards@seymourschool.net)

Thank you for your continued support of your child's education!

Third Grade Teacher,  
Mrs. Nelson, Mrs. Piles, and Ms. Richards

**AMI**

**Day 1**

# "The Lost Kitten"

## Understand It!

Answer the following questions after reading:

Sara loved kittens. She loved them almost as much as she loved her mom and dad. But there was a problem. Sara could not have her own kitten. Her mom was **allergic** to kittens. Every time her mom was near a kitten she started to sneeze. Her cheeks turned bright red and her eyes got **puffy**. Sara was sad about not being able to have a kitten. But she understood. One day Sara and her mom went to the store. When they got out of the car a kitten came **darting** up to Sara. The kitten purred and purred at Sara. Sara looked at her mom, wanting to ask if they could keep the kitten. Sara's mom told her to **scoop** up the kitten. They would make sure to find it a good home. The next day Sara's **neighbors** decided to keep the kitten. Now Sara can see it any time she wants. It's just like having her own kitten.

- The main idea was...
  - going to the store
  - sneezing
  - getting Sara a kitten
  - puffy eyes
- I predict Sara's mom would be \_\_\_ if the kitten lived with them.
  - allergic
  - happy
  - excited
  - healthy
- Why didn't Sara ask to keep the kitten?
  - she was scared of cats
  - she didn't like cats
  - she thinks cats are mean
  - she knew her mom was allergic
- Which word below best describes Sara's mom?
  - selfish
  - loving
  - mean
  - frustrated

**Word Work** Color the words in the passage that match each category below:

 red Contractions

 blue Plurals

 green Adjectives

 orange Proper Nouns

**Vocabulary** Copy the 5 **bold** words from the passage. Use context clues and what you know to define each word:

1	_____	_____
2	_____	_____
3	_____	_____
4	_____	_____
5	_____	_____

# Comprehension: Thinking Deeper About Fiction

introduce	profession	envelope	showing

Pick two words and use them to write a sentence.

---

---

### CHALLENGE

Can you think of any other words that could be added to the table?

--	--	--

Name: \_\_\_\_\_

# Earth

by Cynthia Sherwood

Earth is the "just right" planet. It's not too close to the sun and it's not too far away. That means Earth doesn't get too hot or too cold, unlike all the other planets. Because of its comfortable temperatures, Earth is the only place in the entire universe where we know that life exists. That makes Earth very special!

Earth is unique in another way too. Living creatures must have water to survive. Since water covers about seventy percent of Earth's surface, our planet is an ideal place to support life in many different forms. The rest of Earth's surface is made up of seven land masses called *continents*.

Scientists say Earth is about four-and-a-half billion years old. Fossils show microscopic life first appeared about a billion years later. Evidence of the first human beings came much later—only about 200 thousand years ago. That's many millions of years after the dinosaurs became extinct.

Earth is the fifth largest planet and the third planet from the sun, which is about 93 million miles away. It takes one year for Earth to travel completely around the sun. Earth also spins around like a top, going about a thousand miles an hour. You'd think we'd all need seat belts! Earth rotates around like this once every twenty-four hours, and that's what gives us night and day.

Earth is divided into several layers: the top part is called the *crust*, the part below that is called the *mantle*, and the part in the center is called the *core*. The core is solid and is probably made up of iron. Temperatures at the center of the core may be even hotter than the surface of the sun!

Scientists who study Earth are called *geologists*. Astronauts can also study Earth from space, adding to what we know about our unique and beautiful blue and green planet. Don't you feel lucky to live on the "just right" planet?

Name: \_\_\_\_\_

# Earth

by Cynthia Sherwood

1. Complete the following sentences with information from the article.  
Seventy percent of the Earth's surface is covered in \_\_\_\_\_.  
Earth is \_\_\_\_\_ years old.  
Earth is the \_\_\_\_\_ planet from the sun.  
Earth is the \_\_\_\_\_ largest planet in our solar system.  
Earth is \_\_\_\_\_ miles away from the sun.
2. What causes night and day on Earth?
  - a. The rotation of Earth.
  - b. Earth orbiting the sun.
  - c. The moon moving around Earth.
  - d. Wind moving across Earth.
4. Which sentence correctly describes Earth's layers?
  - a. The crust is below the mantle.
  - b. The mantle is below the core.
  - c. The mantle is above the crust.
  - d. The mantle is below the crust.
5. Describe the temperature at the center of the Earth.  
\_\_\_\_\_

**Challenge:**

People have never walked on any planet besides Earth. (Astronauts have been to the moon, but that's not a planet.) On a separate sheet of paper, write a paragraph telling why you would or would not like to visit another planet.

Name: \_\_\_\_\_

## ART AMI ACTIVITIES 1&2

---

Mrs. Dean

E-mail: [adean@seymourschool.net](mailto:adean@seymourschool.net) (preferred method of communication)

Phone: 417-207-3844

I will be available for contact from 9 a.m. to 1 p.m.

(If messaged outside time above I will try to respond within an hour)

When completing Art activities feel free to use whatever materials you have available.

## Cubism Self Portrait

Cubism is a style of painting that was developed in the early 1900s, and shows objects from many angles at once. Two main artists, Pablo Picasso and Georges Braque, developed Cubism. They believed that painters should not just present realistic views of subjects. Instead, they wanted to show every part of the whole subject.

Students can follow this simple tutorial to draw a face that half profile and half front view. It's a fun way to draw a literal interpretation of the word "cubism".

### NATIONAL ARTS STANDARDS

VA:Cr1.2.2a Make art or design with various materials and tools to explore personal interests, questions, and curiosity.

### DIRECTIONS

PREP: Print template guide on page 61 for each student.

- Students follow the tutorial to draw a simple cubism style face, with their own hair added. The emphasis is on keeping the drawing very simple. No fancy eyes or clothes are needed.
- The drawing is traced with a thick black marker.
- The drawing is colored with markers or crayons or pastels. The goal is to use unusual colors - the brighter and bolder, the better!

### MATERIALS

- White drawing paper
- Black permanent marker, chisel tip
- Crayons or markers  
(I used Creativity Street Glide-On Tempera Color Sticks)

Activity 1

# Cubism SELF PORTRAIT TUTORIAL

Supplies: Markers and or oil pastels

1. Fold for guide lines. Draw head and neck.

2. Start the profile nose.

3. Add the profile mouth and chin.

4. Draw the left profile face.

5. Draw direct looking right eye.

6. Add right lips.

7. Add two ears, they needn't match.

8. Finish with hair. Trace and color.

### My Math 6.7 - Multiply by 10 Practice

Skip count to find each product. Write the addition sentence.

1.  $5 \times 10 = \underline{\quad}$        $10 + \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$

2.  $2 \times 10 = \underline{\quad}$        $10 + \underline{\quad} = \underline{\quad}$

3.  $7 \times 10 = \underline{\quad}$        $10 + \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$

Use the number line to find each unknown.

4.  $\square \times 4 = 40$   
 $4 \times \square = 40$

5.  $10 \times \square = 30$   
 $\square \times 10 = 30$

6.  $8 \times 10 = \square$   
 $10 \times 8 = \square$

The unknown is \_\_\_\_\_.      The unknown is \_\_\_\_\_.      The unknown is \_\_\_\_\_.

Multiply

6.  $10 \times 9 = \underline{\quad}$

7.  $10 \times 3 = \underline{\quad}$

8. 
$$\begin{array}{r} 10 \\ \times 6 \\ \hline \square \end{array}$$

Use the Commutative Property to find each product. Draw a line to match.

9.  $1 \times 10 = \square$

$10 \times 1 = 10$

10.  $10 \times 8 = \square$

$2 \times 10 = 20$

11.  $10 \times 2 = \square$

$10 \times 8 = 80$

# "Time to RECYCLE"

## Understand It!

Answer the following questions after reading:

Jake and his friends were playing football at recess. Jake's friend Sam threw the football so far Jake had to run as fast as he could to catch it. Jake made the catch! As he caught the ball he felt something hard under his foot. Jake looked down and saw a **dozen** different **crushed** soda cans in the grass. He looked some more. He saw plastic bags, papers, and some glass jars too. Jake wondered how all that trash got there. It didn't make sense. Who would throw their trash on the side of the school playground? It made Jake mad. It made Jake want to do something. So, he called all his friends over and they **created** a plan. The boys agreed to clean up the trash at recess the next day. They also **decided** to make recycling posters and put them around the school. Their **goal** was to never see trash on their playground again!

1. The main idea was...
  - a. football
  - b. recycling
  - c. recess
  - d. making posters
2. I predict the narrator would be \_\_\_ if he saw more trash in a week.
  - a. happy
  - b. excited
  - c. patient
  - d. sad
3. What was Jake upset about the most?
  - a. That people threw their trash on the playground
  - b. Missing the catch
  - c. Having to pick up trash
  - d. Making posters
4. What trait best describes Jake?
  - a. careless
  - b. funny
  - c. selfish
  - d. caring

**Word Work** Color the words in the passage that match each category below:

### CHALLENGE

Can you think of any other words that could be added to the table?

--	--	--

Name: \_\_\_\_\_

# Jupiter

by Cynthia Sherwood

If Jupiter were a person, it might run around chanting "I'm number one! I'm number one!" That's because Jupiter is the largest planet in our solar system and the one that spins the fastest. It also has the most moons of any planet and the largest

moon. Jupiter also has the strongest gravity of all the planets. Ancient astronomers knew what they were doing when they named Jupiter after the Roman king of the gods.

It would take about a thousand Earths to fill up Jupiter. But for a gigantic planet, Jupiter moves very fast. It rotates on its axis about every ten hours, compared to Earth which takes 24 hours. Jupiter takes about 12 years to orbit the sun.

Jupiter isn't first in everything. It's the fifth planet from the sun and it's only the third brightest object in the night sky, behind the moon and Venus.

Jupiter is one of the gas giants. Its surface is made of thick red, brown, yellow, and white clouds. One huge area of that surface is called the "Great Red Spot." That's where a storm three times bigger than Earth has raged for more than 300 years! Imagine winds stronger than a hurricane lasting for centuries.

Jupiter has at least 63 moons. Most are fairly small, but four are quite large. They were first discovered by the astronomer Galileo in the year 1610 using one of the earliest telescopes. The largest of Jupiter's moons is named Ganymede. It's even bigger than the planet Mercury!

Six space probes have traveled to Jupiter, so scientists have a lot of information about the planet. You can do your own study of Jupiter just by staring at the night sky. If you see a really bright star that's high in the sky, you're probably seeing Jupiter, the number one planet.

Name: \_\_\_\_\_

# Jupiter

by Cynthia Sherwood

1. Tell whether each statement is true or false.

\_\_\_\_\_ Jupiter is the largest planet in our solar system.

\_\_\_\_\_ Jupiter spins faster than any other planet.

\_\_\_\_\_ Jupiter is the closest planet to the sun.

\_\_\_\_\_ Jupiter has the most rings of any planet.

\_\_\_\_\_ Jupiter is the brightest object in our night sky.

2. What is the "Great Red Spot"?

\_\_\_\_\_

3. How long does it take Jupiter to travel around the sun?

\_\_\_\_\_

4. How long does it take Jupiter to rotate around on its axis?

\_\_\_\_\_

**Challenge:** How many years ago did Galileo discover Jupiter's moons? Use your Math skills!

# ART AMI ACTIVITIES 1&2

Mrs. Dean

E-mail: [adean@seymourschool.net](mailto:adean@seymourschool.net) (preferred method of communication)

Phone: 417-207-3844

I will be available for contact from 9 a.m. to 1 p.m.

(If messaged outside time above I will try to respond within an hour)

When completing Art activities feel free to use whatever materials you have available.

# Vasarely Color Project

Victor Vasarely (1906-1997) was a Hungarian-French artist who became one of the leading figures of the Op art movement. Through the use of precise and abstract shapes, his art had a quality that is not seen in other styles of art.

## GOAL

Students use lines to trace abstract shapes in the style of Victor Vasarely. The circles and squares are colored in a way to learn more about warm and cool colors.

## ELEMENTS OF ART

Line, Shape, Value, Color

## MATERIALS

- Drawing paper
- Black marker
- Markers

## DIRECTIONS

1. Print a template. Choose a random group of circles to trace.
2. Trace squares in the remaining spaces.
3. Color the inside four squares with warm or cool colors.
4. Fill in the remaining squares with warm or cool colors.

Activitu 2

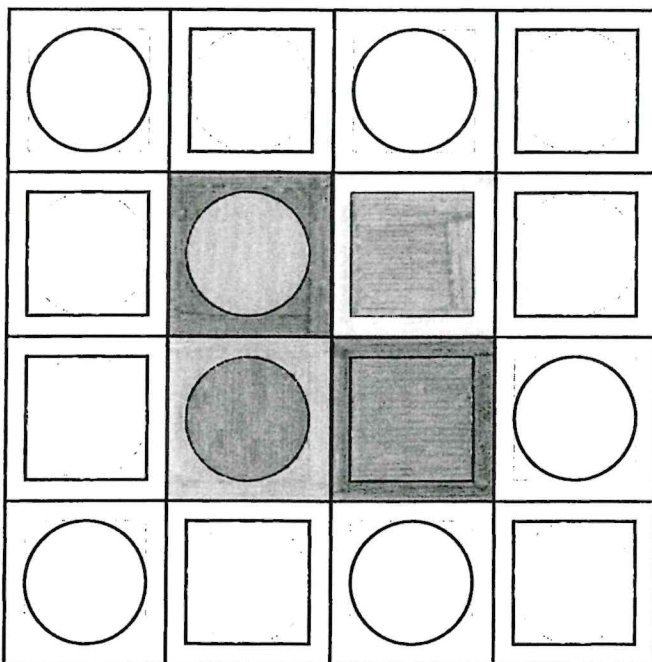

# Vasarely Color Project

1. Print a template. Choose a random group of circles to trace.

2. Trace squares in the remaining spaces.

3. Color the inside four squares with warm or cool colors.

4. Fill in the remaining squares with warm or cool colors.

# Vasarely Template

### My Math 7.3 - Hands On: Double a Known Fact Practice

Use counters to model a known fact that will help you find the first product.  
Draw the model two times.

1.  $4 \times 2 = \underline{\quad}$

Known fact:  $2 \times 2 = \underline{\quad}$

Double the product:  $4 + 4 = \underline{\quad}$

2.  $4 \times 5 = \underline{\quad}$

Known fact:  $2 \times 5 = \underline{\quad}$

Double the product:  $10 + 10 = \underline{\quad}$

3.  $6 \times 5 = \underline{\quad}$

Known fact:  $\underline{\quad}$

Double the product:  $\underline{\quad}$

4.  $8 \times 3 = \underline{\quad}$

Known fact:  $\underline{\quad}$

Double the product:  $\underline{\quad}$

Use counters to double the known fact. Write the product it helps you find.

5.  $2 \times 9 = \underline{\quad}$

$2 \times 9 = \underline{\quad}$

$\underline{\quad} \times \underline{\quad} = \underline{\quad}$

6.  $4 \times 6 = \underline{\quad}$

$4 \times 6 = \underline{\quad}$

$\underline{\quad} \times \underline{\quad} = \underline{\quad}$

# "A Visit to the Fire Station"

## Understand It!

Answer the following questions after reading:

Last week our class took a field trip to the fire station. Our teacher, Mrs. Smith, told us we would learn a lot about fire **safety**. My friends and I thought it was silly. We didn't think we would learn anything new. But we were wrong! We all knew to call 911 if we saw a fire or smoke. But no one in our class ever thought about making a plan at home in case of a fire. None of our families talked about where we would meet if there was a fire. And we never **practiced** a fire **drill** at home! We all got to try on the big, **bulky**, heavy fire jackets. We learned never to hide during a fire, but to find the safest escape. Mrs. Smith was right when she told us to take this field trip **serious**. We did have a lot more to learn about fire safety. My friends and I all promised to go home and make a fire safety plan with our parents.

1. The main idea was...
  - a. class field trips
  - b. fire jackets
  - c. fire safety
  - d. calling 911
2. I predict the narrator will go home and \_\_\_\_\_.
  - a. forget what he learned
  - b. make a fire safety plan
  - c. think the trip was boring
  - d. forget to make a plan
3. What does the narrator first think of the trip?
  - a. it will be boring
  - b. it will be amazing
  - c. it will be scary
  - d. it will be long
4. What trait best describes the narrator?
  - a. funny
  - b. scared
  - c. angry
  - d. smart

**Word Work** Color the words in the passage that match each category below:

### CHALLENGE

Can you think of any other words that could be added to the table?

--	--	--

Name: \_\_\_\_\_

# Mars

by Cynthia Sherwood

The "Red Planet"—Mars—is the fourth planet from the sun and one of Earth's next door neighbors. Mars was named after the Roman God of war because its reddish-orange color looks a little like blood. The special color actually comes from rust and other minerals in its soil.

The surface of Mars includes many amazing features. There's a canyon that's much deeper and longer than the Grand Canyon in Arizona. There's also a volcano that's the largest in our solar system. "Olympus Mons" volcano is fourteen miles tall. That's three times higher than Mount Everest! The base of Olympus Mons is about the size of the state of Missouri.

Scientists say there's strong evidence that water once flowed over the surface of Mars. They also think there still may be water in some places underneath the surface.

You may have read a book or seen a movie that featured "Martians." There's no evidence of any little green men on Mars, but some scientists do think they've found proof that tiny, microscopic creatures once lived on Mars. The evidence comes from meteorites found on Earth. Other scientists say they don't believe it, so we don't know the right answer.

Images Courtesy NASA/JPL-Caltech

Scientists have sent radio-controlled robots to Mars. These machines, called rovers, have cameras, microscopes, and drills on them. Scientists can drive the rovers around the Red Planet, just like the radio-controlled toy cars many kids have on Earth. The rovers are actually able to send pictures back to Earth.

While rovers roam the planet every day, no person has ever set foot on Mars. NASA has made plans for a manned mission to take place decades from now. Perhaps then we'll learn the truth of whether there was once life on a planet besides Earth.

Name: \_\_\_\_\_

# Mars

by Cynthia Sherwood

1. How did Mars get its reddish color?  
\_\_\_\_\_
2. Have there ever been living things on Mars?
  - a. No
  - b. Yes
  - c. Only below the soil
  - d. Some scientists think so, but others aren't sure.
3. Which fact about Mars is true?
  - a. Mars is the only planet with soil.
  - b. Mars is the only planet with volcanoes.
  - c. Mars is the closest planet to the sun.
  - d. None of these facts are true.
4. What is Olympus Mons?
  - a. a canyon
  - b. a volcano
  - c. a crater
  - d. a moon
5. How many people have walked on Mars?
  - a. one
  - b. two
  - c. eleven
  - d. none
6. What is a Mars rover?

### My Math 9.5 - Write Expressions Practice

Use numbers and operations to write each phrase as an expression.

1. 3 more than 5

-----

2. half of 12

-----

3. 4 rows with 2 people in each

-----

4. 5 people equally divide \$25

-----

There are 8 toys in the toy box. Write an expression to tell how many there will be when there are:

5. 3 fewer toys

-----

6. twice as many toys

-----

7. 4 equal groups of toys

-----

8. 6 more toys

-----

Write an expression for each.

9. the cost of 3 candy bars

-----

Cost of Snacks	
Popcorn	10¢
Chips	60¢
Cotton Candy	75¢
Candy Bar	10¢

10. The number of bags of popcorn for 50¢

-----

# "Saving Money is Hard!"

Since as long as he can remember Jamal has wanted his very own skateboard. He was tired of **borrowing** from his friends. Jamal's mom told him she couldn't afford a skateboard. She said he should save his money and buy his own. Jamal had been trying to save his money for a long time. But saving money was so hard! Every time Jamal went to a store he was **tempted** to buy candy, gum and toys. Jamal knew he could **afford** these things. But if he bought them, he would have no money saved for a skateboard. Jamal **whined** a lot about wanting something in every store. He felt sad about not getting things. He knew if he **sacrificed** the small things he would soon have enough for the skateboard. Finally, the day came when Jamal could buy his board. All that saving was worth it. He couldn't wait to show off his new board!

## Understand It!

Answer the following questions after reading:

1. The main idea was...
  - a. buying candy
  - b. saving for a skateboard
  - c. buying toys
  - d. saving for a bike
2. I know Jamal is frustrated because...
  - a. he was whining
  - b. he liked waiting
  - c. he wasn't tempted
  - d. he liked saving
3. What was Jamal upset about the most?
  - a. buying toys
  - b. borrowing skateboards
  - c. buying a skateboard
  - d. having to wait
4. What trait best describes Jamal in this story?
  - a. frustrated
  - b. patient
  - c. boring
  - d. funny

**Word Work** Color the words in the passage that match each category below:

Contractions

Plurals

Adjectives

Prepositions

**Vocabulary** Copy the 5 **bold** words from the passage. Use context clues and what you know to define each word:

## CHALLENGE

Can you think of any other words that could be added to the table?

--	--	--

Name: \_\_\_\_\_

# Mercury

by Cynthia Sherwood

Mercury is the planet nearest the sun. It's so close that if you were standing on Mercury, the sun would appear two and a half times bigger than what it looks like from here on Earth.

Even the best sunscreen wouldn't be enough on Mercury. The sun's rays are about seven times stronger than on Earth. Mercury is dry, very hot, and practically airless. Mercury is also the smallest planet in our solar system. Because it's often blocked by the glare of the sun, Mercury can be hard to see without a telescope.

Mercury is named after a Roman god who was a messenger known for his speed. As a planet, Mercury moves around the sun faster than any other. It revolves around the sun about once every 88 Earth days.

## *Did you know....*

Even though Mercury is the closest planet to the sun, it is **not** the hottest planet!

Venus, the second planet from the sun, has hotter temperatures than Mercury. This is because Venus has a thick layer of clouds that trap in heat like a blanket.

Mercury is made up of rock with iron at its core. Its surface looks a lot like our moon, with many craters. Radar images from Earth show that craters at Mercury's north and south poles may contain frozen water, or ice. Scientists couldn't believe it at first. Parts of Mercury reach 800 degrees Fahrenheit (427 degrees Celsius), so they definitely didn't expect to find ice! But it turns out the poles of Mercury are always in the shade of the sun, so they remain extremely cold.

By the way, you'd never be able to enjoy a blue sky on Mercury. Because there's no atmosphere, the sky always appears black. You might even see stars—during the daytime!

Name: \_\_\_\_\_

# Mercury

by Cynthia Sherwood

1. Why is Mercury usually hard to see without a telescope?

\_\_\_\_\_

2. Mercury is the closest planet to the sun, but Venus is the hottest. Why?

\_\_\_\_\_

\_\_\_\_\_

3. Mercury was named after the Roman god of speed. Why is this an appropriate name for the planet?

\_\_\_\_\_

\_\_\_\_\_

4. How is it possible for Mercury to have frozen ice?

- a. Mercury is a cold planet.
- b. Mercury has a different type of ice that can form in warm temperatures.
- c. Parts of Mercury are cold because they always face away from the sun.
- d. Mercury has ice because it moves so quickly around the sun.

5. What does the underlined word mean in the sentence below?

Because there's no atmosphere, the sky always appears black.

- a. layer of air or gas
- b. living things
- c. soil or craters
- d. volcano activity

# "BUT I NEED THAT!"

## Understand It!

Answer the following questions after reading:

It never **fails** that every time Julia's mom takes her anywhere, Julia **begs** for her mom to buy her something. It doesn't matter where they are. Julia will find something she wants. She **usually** starts off by asking her mom very nicely when she **spots** something she wants. Julia's mom almost always says, 'not today dear.' That's when Julia starts whining. She says, 'but mom...I NEED that!' It doesn't matter if it's a piece of candy or a new shirt. Julia always thinks she 'needs' everything. Julia's mom told her that she didn't 'need' those things, she just wanted them. She told Julia she would make a deal. She would buy all the things Julia 'needed.' Then Julia could do **chores** to save money for the things she 'wanted.' They made a list of chores she could do. Soon Julia was buying things she wanted for herself.

1. The main idea was...
  - a. Julia wants everything
  - b. going shopping
  - c. chores
  - d. buying a new shirt
2. How did Julia feel when her mom said no?
  - a. she handled it fine
  - b. she said okay
  - c. she thought she needed everything
  - d. she didn't care
3. How do you think Julia felt at the end of the story?
  - a. confused
  - b. excited
  - c. sad
  - d. angry
4. What trait best describes Julia's mom?
  - a. mean
  - b. fair
  - c. quiet
  - d. angry

Name: \_\_\_\_\_

# Neptune

by Cynthia Sherwood

Neptune is the eighth planet from the sun and the one that's the farthest away. (Pluto is even farther, but it doesn't count since most astronomers no longer consider it a planet.)

Neptune is a cold, dark place that's the smallest of the gas giants. It was named after the Roman god of water and the sea.

Neptune is a ball of gas and ice, with a rocky core. Thick bright blue clouds cover its surface. They're made up mainly of frozen methane gas. Like the other "gas giant" planets, winds that blow Neptune's clouds around are very strong. Scientists say winds reach speeds of up to 700 miles an hour (about 1,120 kilometers per hour).

Neptune isn't quite as cold as Uranus, but its largest moon, Triton, is even colder. Triton has a surface temperature of minus 390 degrees Fahrenheit (minus 234 Celsius), which is the coldest known temperature in the solar system. Scientists think that Triton used to be a large comet that became trapped by Neptune's gravity.

## How it Was Named...

Neptune was named for the Roman god of the Sea. Early astronomers may have named it after the sea god because of its deep blue color.

Because it's so far away, Neptune only has had one visit from a spacecraft. NASA's Voyager 2 flew by Neptune in 1989. Voyager discovered a huge storm on Neptune that it called the "Great Dark Spot," similar to Jupiter's "Great Red Spot." But later pictures from the Hubble Telescope found that the Great Dark Spot had vanished.

Luckily for us, Neptune and Earth don't have much in common. But one thing is very similar. The force of gravity pulling you down is almost the same on Neptune and Earth. Of course, if you tried to walk on Neptune, you'd be pulled in towards the center because there's no solid surface to stand on.

Name: \_\_\_\_\_

# Neptune

by Cynthia Sherwood

1. How was Neptune's "Great Dark Spot" discovered?  
\_\_\_\_\_
2. What was Neptune's "Great Dark Spot"?  
\_\_\_\_\_
3. Why was Neptune probably named after the Roman sea god?  
\_\_\_\_\_
4. How is Neptune and Earth similar?
  - a. They are about the same size.
  - b. They both have giant dark spots.
  - c. They both have about the same amount of gravity.
  - d. They are both very cold planets.
5. Which fact about Triton is true?
  - a. Triton is a moon of Uranus.
  - b. Triton is a tiny planet near Neptune.
  - c. Triton is the windiest known place in the solar system.
  - d. Triton is the coldest known place in the solar system.
6. Which planet is further from the sun than Neptune?
  - a. Saturn
  - b. Uranus
  - c. All planets are farther than Neptune.
  - d. There are no planets further than Neptune.

### My Math 9.8 - Solve Two-Step Word Problems Practice

Write an equation with a letter for the unknown. Then solve. Check for reasonableness.

1. José practiced his spelling words 5 minutes a day for 3 days. He still had to practice for 5 more minutes. How many minutes total did he have to study?

-----

2. Kendell gave away 6 of her stickers to her brother. Later, she gave away 8 of her stickers to her friend. She started with 18 stickers. How many stickers does she have left?

-----

Circle the correct equation. Then solve the problem.

3. Mae earns \$12 a week for her allowance. She spends \$5 and saves the rest. How much money does she have saved after 6 weeks?

$$\$12 - \$5 \times 6 = s \qquad (\$12 - \$5) \times 6 = s$$

-----

Find each unknown.

4.  $p \times 3 = 12$

5.  $30 \div v = 6$

6.  $8 + 2 = 10 \times g$

$p =$  \_\_\_\_\_

$v =$  \_\_\_\_\_

$g =$  \_\_\_\_\_

# "A surprise in the park"

Trey, Sam, and Matt were playing hide-and-seek in the park after school. They started counting to 100 as Matt and Sam ran off to hide. Sam was great at finding the best hiding places. It always took Trey and Matt forever to find him. But this time was different. Before Trey could count to 100 he heard Sam shout at the top of his lungs. He was **hollering** for Trey and Matt to hurry over. He didn't even pretend to hide. Trey and Matt looked at each other funny before running over. Sam didn't say anything when they got there. He **simply** pointed at the ground. There was a **fossil** in the dirt. It **appeared** to be a dinosaur foot! The boys rushed the fossil to their teacher the next day. Their teacher **confirmed** it was a dinosaur fossil. The boys went back to hunt for more fossils. But they never found another fossil again.

## Understand It!

Answer the following questions after reading:

- The word 'pretend' in the passage means...
  - really do something
  - hide
  - make believe
  - be quiet
- They probably found the fossil because...
  - the dirt washed away
  - it was hard to see
  - it was old
  - they were looking for fossils
- Finding a dinosaur fossil is the same as...
  - any other day
  - going on vacation
  - an unexpected surprise
  - following a routine
- What is the most important event?
  - pointing at the fossil
  - going to school
  - looking for fossils
  - finding the fossil

### CHALLENGE

Can you think of any other words that could be added to the table?

--	--	--

Name: \_\_\_\_\_

# Saturn

by Cynthia Sherwood

If you don't count Earth, the most beautiful planet in our solar system may be Saturn. Saturn has seven thin rings that surround its middle but don't actually touch it.

The rings are made of billions of pieces of ice and can only be seen with a telescope.

You can spot the rest of Saturn using only your eyes. It's the second largest planet in the solar system and it's the third brightest planet in the sky. It usually looks yellow.

Saturn is the sixth planet from the sun and is named after the Roman god of Agriculture. Scientists believe Saturn is a giant ball of gas, with no solid surface. Inside they think there's a hot solid core of rocky material, surrounded by an outer core of gas. Saturn is considered one of the four "gas giant" planets.

If you've ever been through a hurricane, you know what extremely strong winds are like. But even a hurricane is nothing compared to the winds on Saturn. Its strongest winds blow at more than a 1,000 miles per hour (1,600 kilometers per hour)! Saturn is also quite cold because it's so far from the sun. The temperature is about 285 degrees below zero Fahrenheit (minus 176 Celsius).

In 2004, a spacecraft named the "Cassini" began to orbit Saturn. This was the first in-depth and close-up view of the planet. Cassini has given us amazing pictures of Saturn, its rings, and its moons. Scientists have discovered that Saturn's largest moon—named Titan—is similar to Earth before there was life.

By the way, if you were born on Saturn, you'd have to wait a long time for your birthday to arrive. The length of a Saturn year is 29.5 Earth years, because that's how long it takes Saturn to revolve around the sun.
